

ASUCplus continues to grow

Wilky Foundations (part of the Wilky Group Ltd) has recently been elected a full member of ASUCplus. This brings the total membership to 20 major companies (following the appointment of the London Basement Company earlier in the year). ASUCplus now represents over 80% of the specialist subsidence market.

A company cannot join ASUCplus until it has undergone technical, financial and health & safety audits and made a commitment to the training of its operatives.

ASUCplus's continued emphasis on health & safety is acknowledged to be way ahead of the rest of the industry. All member companies are audited on a rolling programme of continuous assessment and are required to submit safety statistics every three months. The association also runs regular training courses and workshops for its members to ensure they are up-to-date with current legislation and industry practices.

It is ASUCplus's unrivalled reputation within the industry that enables all members to offer its unique 12 year insurance-backed guarantee. An ASUCplus guarantee is increasingly being seen as an essential part of any contract. Not only does it give the current householder peace of mind and protection but greatly assists when marketing the property in the future.

A full directory of ASUCplus members – showing each company's area of expertise - as well as all its publications (including the Health & Safety Guidelines) can be downloaded from www.asuc.org.uk
